## INTRODUCTION

The realisation of the objectives upheld by a welfare State is necessarily an inducement to extend Governmental activities over a variety of subjects including undertaking new responsibilities for meeting a host of social obligations. The budget of the State is a true reflection of totality of efforts on the part of the Government to discharge those responsibilities.

2. In view of the fact that the budget incorporates materials of wide public interest, especially in the context of planned developmental efforts, it is but imperative that the basic contents of this important document should be presented in a simpler form to make it readily understandable to all. This brochure is an attempt at meeting this requirement. It unfolds, by means of statements and charts, the salient features of the budget for the year 1970-71 along with those for 1969-70, 1968-69, 1965-66, 1960-61, 1953-56 and 1950-51. To facilitate better comprehension of the growth of budgetary transactions indices have been worked out for several items with 1950-51 as the base year.

3. The estimates of receipts and expenditure for the year 1970-71 shown in the brochure are those placed before the Legislative Assembly (March, 1970) and are subject to changes in the course of budget discussions. The figures upto the year 1968-69 represent actuals while those for 1969-70 and 1970-71 are revised and budget estimates respectively.

4. With a view to depicting the full extent of Government expenditure as also to facilitate inter-State comparability the expenditure has been presented on "gross" basis as distinct from "net" expenditure shown in Financial Statements which is arrived at after adjusting the recoveries from gross expenditure. However, in order to avoid confusion, both "net" and "gross" figures have been presented side by side wherever felt necessary.

## REVENUE EXPENDITURE

## REVENUE EXPENDITURE

Gross expenditure from Revenue heads has increased from Rs.9.7 crores in 1950-51 to Rs. 109.3 crores in 1969-70 representing a rise of about twelve times.

This increase is due to the vastly expanded scale of expenditure under Social and Economic and Development services under the Five Year Plans. The relative share of expenditure under these heads has risen from 34 per cent in 1950-51 to 46 per cent in 1970-71.
